

The Mensa Forensic Science Day

University of Huddersfield
Saturday 9th February 2013
10.00am to 4.30pm

Forensic science refers to the use of scientific techniques in the investigation of criminal cases. From its inception in the 1930s it has evolved into a complex science encompassing chemistry, biology, physics, botany, zoology, entomology, anthropology, medicine, dentistry, psychology and psychiatry.

The Forensic Science Day will give you a basic understanding of both the theoretical and practical aspects of this fascinating subject. No previous knowledge is required. Please note if bringing children that blood and knives will form visual and physical parts of the practical sessions.

The University of Huddersfield was established in 1825 and the Queensgate campus is now a leading site for training forensic scientists. This event will be led by the head forensic scientist and their team.

The cost is £35.00 per adult or £27.00 per child. This includes exclusive use of the laboratories and lecture theatre, all materials, protective clothing, lectures, buffet lunch and refreshments. Families and guests are most welcome. The nature of the activities means that places are limited to 50 participants. Booking deadline is 1st February 2013.

This event is being organised exclusively for British Mensa by **Maruba Events** in conjunction with.....

The Forensic Science Day programme...

10.00am-10.30am
Arrival and registration.

10.30am-11.10am
Lecture: "An introduction to forensics".
A frank look at the subject area; the reality, its use, its limitations.

11.10am-11.20am
Tea/coffee break.

11.20am-12.40pm
Participants will be split into two groups and rotate between two interactive sessions (40 minutes each) on bloodstain pattern analysis and forensic computing.

12.40pm-1.25pm
Buffet lunch including vegetarian options and hot and cold drinks.

1.25pm-3.40pm
Participants will be split into four groups and rotate between four practical hands-on sessions (30 minutes each) with a tea/coffee break mid-afternoon. Please wear casual clothes but no open toed shoes.

- *Drugs or a dangerous concoction?* The analysis of unknown samples at crime scenes.
- *Clothing damage analysis.* How evidence from clothing can suggest the weapon.
- *DNA analysis.* How scientists extract DNA from victims.
- *Entomology.* An introduction to identification.

3.40pm-4.15pm
Lecture: "Maggots, mummies and Mona Lisa".
A talk by an Italian forensic entomologist who has worked on projects including the recovery of remains, one of whom may be the subject of the Mona Lisa.

4.15pm-4.30pm
Question and answer session then goodbyes.
